

Digital platform exercise - Day 1

Demonstration of digital platforms for communicating local knowledge

15.00-15.45. **Group work**

Divide in 5 groups, each with 4-5 persons and one computer

Search the internet, locate PISUNA-net

Make the following search:

Muskox , Attu in August 2015 (enter muskox in "All living res.", enter "Attu" in "All comm.")

Answer the questions:

- What are the community members observing?
- Is the status changing?
- Importance and other comments from the perspective of the community members?
- Should anything be done about it (what action, by whom)?

If time permits, continue with:

2) Atlantic cod, Kangarsuatsiaq in January 2016

3) Thick-billed murre, Qaanaaq in June 2016

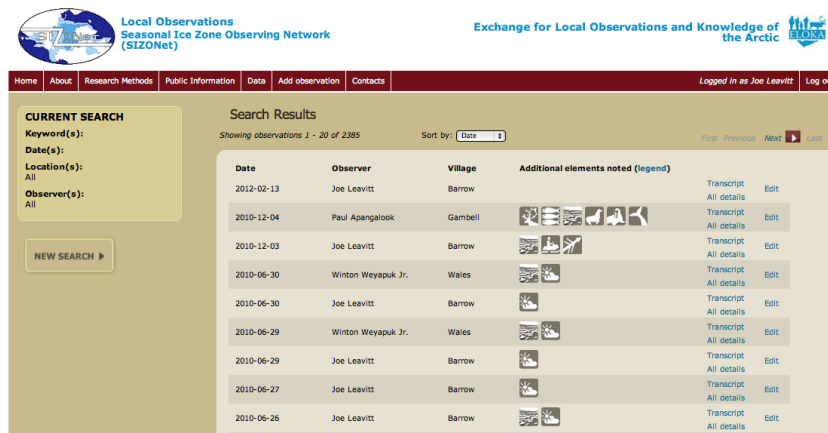

4) Walrus, Attu in March 2019

5) Seal (=harp seal), Akunnaaq in July 2018

If there is more time, locate the original form in pisuna.org. Who participated? For example in Kangarsuatsiaq in January 2016.

15.45 **Plenum.** Each group present their findings, answer questions
