

UArctic Thematic Network on Arctic Telecommunications and Networking

Member info

Juha Saunavaara

Hokkaido University

juha.saunavaara@arc.hokudai.ac.jp

Juha Saunavaara is Assistant Professor at the Hokkaido University Arctic Research Center (Social Science and Humanities Research Group). He has earned his Ph.D. in the field of History (University of Oulu) and holds a title of Docent at the University of Turku, Faculty of Social Sciences, Center for East Asian Studies.

Saunavaara has published in peer-reviewed journals and edited volumes representing various fields reaching from Arctic and Japanese studies to history, geography and international relations. His current research focuses on infrastructure and connectivity in and through the Arctic (for example: submarine fiber-optic cable network, interconnected past, present and future of telecommunication infrastructure and environment); the development of northern and Arctic data center industry; regional development; subnational authorities' international cooperation; and Arctic cruise tourism.
